>Data Came from Project/Built Work and Archival Object

Project/Built Work:

- Name (ENG / DEU)
- Date
- Location*
- Actors*
- Shell Data (Based of scientific comment)
 - o Materials (Stahlbeton, Kunststoff)
 - o Typologies (Buckelschale, Freiform, Ballonform, Shed, Geometrische Form)
 - o Dimensions (Plan, Surface**)

*Original data was mostly not edited. When an error was identified, this was corrected. Data needs to be compared with Legacy Information.

**Whenever it was possible to identify a Surface.

Still to be done:

1. Link coordinates of missing existing Built Work (Hiwi)
2. Link Physical Object to Project/Built Work (Alex)
3. Link Konataktabzüge to Project/Built Work (Alex)
4. Link Text to Oeuvre (Afra)
5. Check inconsistencies of Legacy Data
 - 1) Project/Built Work (Hiwi)
 - a. Actors
 - i. Architect = 30 Entities
 - ii. Bauherr*/Auftraggeber* = 730 Entities
 - iii. Beteiligt = 80 Entities
 - iv. Erwähnt
 - 2) Archival Objects (GTA-Archives?)
 - a. Dates*

*We realized that there are inconsistencies between the Dates of the Archival Objects and their Legacy Information.

How to search:

1. Project/Built Work

a. Actors

i. Architect = 30 Entities

(„Project/Built Work“ + „Actor: Heinz Isler“) NOT (Duplicate/Verify/Etc.) NOT („Actor-type: Architekt“) AND („Legacy Actor: Architekt*“)

ii. Bauherr*/Auftraggeber* = 730 Entities

(„Project/Built Work“ + „Actor: Heinz Isler“) NOT (Duplicate/Verify/Etc.) NOT („Actor-type: Bauherr“ OR „Actor-type: Auftraggeber“) AND („Legacy Actor: Bauherr*“ OR „Legacy Actor: Auftraggeber*“)

iii. Beteiligt = 80 Entities

(„Project/Built Work“ + „Actor: Heinz Isler“) NOT (Duplicate/Verify/Etc.) NOT („Actor-type: Beteiligt(1)“ OR „Actor-type: Beteiligt (2)“ OR „Actor-type: Beteiligt(3)“) AND („Legacy Actor: Beteiligt*“)
